

# PROCESS PIPING DESIGN, FABRICATION AND INSTALLATION

## Get to Market Safely, Reliably and Quickly

TD Industries' full process piping capabilities help you gain a time-to-market competitive edge. Our expertise includes high-purity and special materials design, fabrication and custom cleanroom construction installation.

### Fabrication Capacity

- Modular cleanroom for clean or ultra high-purity (UHP) requirements
- Stainless steel welding up to 30" pipe
- Orbital welding for 1/4" to 6" tubing and piping
- Infrared fusion machines for 20mm - 225mm pipe
- Custom steel and plastic welding, skid fabrication, and more

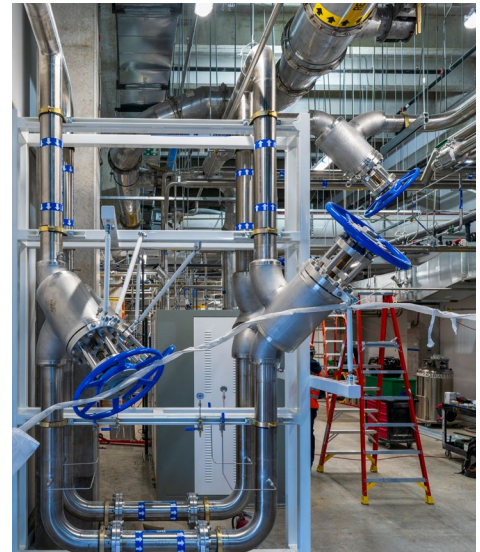

### Process Application Systems

Solutions for Your Project's Needs

- Compressed air
- High- and low-purity gas and chemical
- Hygienic
- Process exhaust
- Process waste
- Pump vacuum
- Sanitary
- Single or double contained

### Material Expertise

- Stainless steel
- Clear PVC
- PVC
- CPVC
- PolyPro
- PVDF
- Glass
- Hastelloy
- Inconel
- Titanium
- Fiberglass

# Expert Services for Your Project

**Mechanical Construction:** Expertise, skilled trades and safety compliance for successful project delivery.

**Off-Site Manufacturing:** 117,000 square feet of manufacturing and prefabrication facilities for your project, including 28,000 sq. ft. for process piping.

**Engineering:** Mitigate design risk and avoid schedule delays with our in-house design-build, design-assist and VDC teams.

## Tailor-Made Solutions

TD's diverse construction skillset and innovation provides customers with high-quality results they can count on. With experienced superintendents, meticulous data management and transparent project risk mitigation, customers can trust TD to create best-in-class solutions that prioritize their project's specific needs.

## Serving All Industries

- Data centers, including liquid cooling
- Domestic semiconductor manufacturing
- Food and beverage
- Life sciences, laboratories
- Pharmaceutical
- Healthcare
- Higher education
- EV battery and solar panel facilities
- Expert installation of cleanroom architectural walls, ceilings and floors.

## UHP Fabrication & Installation for FARS

Meet the latest compliance requirements and improve your building's safety with one of the leading fabricators and installers of FARS systems — and the first to do it in Texas.
